History alive textbook 6th grade glossary

history a record or narrative description of past events prehistory the time during human culture before the written word archaeologist an anthropologist who studies prehistoric culture nomad a member of a people who have no permanent home fertile capable of reproducing domesticate make fit for cultivation and service to humans East Africa a geographical area in eastern Africa irrigation the act of supplying dry land with water by artificial means surplus a quantity much larger than is needed artisan a skilled worker who practices some trade or handicraft civilization a society in an advanced state of social development social class people having the same social, economic, or educational status From video-based geography challenges, video activities, to unit inquiry projects, take a quick look at the new features coming soon to the middle school social studies programs. (8:37) Imagine your students traveling back in time to ancient Egypt in a history lesson, experiencing the American Revolution through a game of capture the flag, or examining and discovering fascinating primary sources. TCI's History Alive! programs are revolutionizing teaching and learning in classrooms everywhere with lessons like these. See why our standards-aligned curriculum is perfect for your classroom. Making Teaching And Planning Easier For You Digital Resources to Owe Some Studies Curriculum Social Studies Textbook and Student Workbook Audio and Digital Tutorials Translations, and More Interactive Presentations and Videos Standards-Aligned Inquiry-Based Activities Engage your students in meaningful social studies lessons that allow them to develop critical thinking skills while building a deep understanding of the world around them. From video-based Geography Challenges to Lesson Games, our programs provide opportunities for students to get their thinking caps on about social studies. Students often work in small groups to complete assignments, thinking and talking, and asking big questions. Dynamic hands-on activities inspire students to explore history and actively participate in class. Classroom activities, video activities, and reading activities—flexible lesson plans provide three options to fit your approach to teaching. Each option provides opportunities to develop social studies and literacy skills and assess student learning. Each unit in History Alive! has an optional Inquiry Project that outlines an inquiry-focused pathway through the unit. Students develop questions, use disciplinary sources to build arguments, communicate their conclusions with evidence, and then take informed action. Literacy instruction is built into the Student Text, Interactive Student Notebooks, and Activities. Students engage with—and respond to—relevant primary sources, civic literacy texts, and informational content. Prepare students to become informed, civically engaged members of their communities. Students have meaningful civil discussions and build empathy by reading and learning about various perspectives. TCI's philosophy is grounded in the goal of creating inclusive classroom communities in which students learn about the world through multiple perspectives and make connections to their own lives. Accuracy and diversity drive TCI's curriculum-development process. Our programs are guided by state standards, as well as a commitment to highlighting multiple perspectives and diverse viewpoints in the curriculum. This includes examining multiple perspectives and integrating important primary sources. TCI has an extensive editorial and scholarly review process to ensure that our content is both fair and accurate. TCI's Cooperative Inclusive Classroom provides the foundation for our approach to active learning. This involves creating a classroom environment where all students are valued and have a voice. In this classroom, teachers build meaningful connections with students and act as facilitators for student learning. Teachers also set norms that allow for civil discourse and the respectful expression of viewpoints and perspectives. Making personal connections to content is at the heart of TCI's approach to teaching. Each lesson begins with a preview activity that helps students build background knowledge and make connections to upcoming content. Lessons include opportunities for students to take part in authentic learning assignments in which they are encouraged to apply their personal voice and interests to demonstrate what they have learned. The TCI approach to Social Studies Curriculum Resources and Programs integrates proven teaching strategies, engaging content, and meaningful technology to excite students and foster their love of learning. View Standards Correlations TCI and Inquiry TCI's content also supports students in learning the citizenship skills they need to actively participate in their schools and communities. This includes a Citizenship Toolkit that provides concrete lessons that help students channel their energy and passion in productive ways. TCI's programs are designed with one primary goal: to help students master the essential skills and knowledge. To this end, every unit includes primary sources and activities to make the lessons more inquiry-based and to help your students develop critical-thinking skills. TCI's standards-aligned social studies curriculum meets the criteria for national frameworks such as the College, Career, and Civic Life (C3) Framework. It also aligns with state standards across the United States, all so that teachers can focus on what they do best—teaching. We're ready to support you every step of the way. TCI offers educators a variety of opportunities to expand their professional knowledge. Visit our Events page to attend an upcoming event.
